

## Family AIDS Care and Education Services (FACES)

### Background

Family AIDS Care and Education Services (FACES) works in concert with Kenya Ministry of Health (MOH) and global efforts to attain UNAIDS' 90-90-90 targets by 2020. FACES supports over 70 health facilities in Kisumu County, Kenya and works to increase HIV status knowledge; ensure people living with HIV are linked to care; prevent new infections; deliver and capacity build for sustainable high quality care and treatment; and achieve viral load suppression to improve health outcomes.

### Core Clinical Service Areas:

HIV Testing & Counseling  
Prevention of Mother-to-Child-Transmission (PMTCT)  
Voluntary Medical Male Circumcision (VMMC)  
HIV/TB Care & Treatment

### Accomplishments (Oct 2016 – Aug 2017)

#### HIV Care Cascade

**546,083** people tested for HIV, including 144,634 children

**5,741** (1.1%) people tested diagnosed with HIV, including 355 children

**5,448** (95%) people diagnosed with HIV initiated on ART, including 410 children

**44,209** people living with HIV currently on life-saving ART, including 3,676 children

**86%** of people on ART have suppressed viral loads. *Note: based on prior year's cohort*

#### PMTCT

**13,180** pregnant mothers tested for HIV

**2,138** (16%) pregnant women test diagnosed HIV

**2,102** (98%) pregnant women diagnosed with HIV started on ART

**2,110** (99%) HIV-exposed infants received prophylaxis to prevent HIV infection

**2,881** HIV-exposed infants tested for HIV via PCR

#### VMMC

**46,264** men underwent VMMC to help prevent HIV infection

FACES is a collaboration between the University of California San Francisco (UCSF) and Kenya Medical Research Institute (KEMRI) and is funded through a cooperative agreement with the U.S. Centers for Disease Control and Prevention (CDC)/U.S. President's Emergency Program for AIDS Relief (PEPFAR).
